BOOSTERS

Adapt your routine with an extra

Elixirs and oils, to apply day and night, with an **ultra-intensive effect**.

Elixirs and oils are the perfect complement to elevate your facial routine to another level. Their light and concentrated texture allows a few drops, mixed with your usual day or night cream, to **enhance its benefits and multiply the results**.

Formulated with carefully selected actives, they provide an extra boost of nutrition, radiance, and protection, adapting to the needs of each skin type.

Incorporating them into your care routine gives you an **extra dose of effectiveness** and a **unique sensory experience**, turning each application into a unique and personal beauty ritual.

- With luminous tightening effect.

ACTIVE INGREDIENTS

Micro-gel beads
Vegetable proteins
Biosaccharides

Our facilities

All manufacturing processes are carried out in our 4,000-square-meter facilities located in Barcelona on the shores of the Mediterranean.

The production of our products is carried out entirely in clean production rooms classified as ISO 8.

In these clean rooms, an atmosphere free of contaminant particles is created through a system of filters and airflows for air intake and exhaust. The atmosphere is continuously controlled so that temperature, humidity, internal pressure, and absence of external contamination are optimal to guarantee the quality and safety of the final product.

Furthermore, all enclosures housing the clean rooms (walls, floors, ceilings, doors) are constructed with smooth, non-porous materials and properly sealed to prevent any contamination during the production process and to comply with good manufacturing practice requirements.

These facilities are periodically subjected to tests verifying the air purity in the clean rooms, based on the measurement of particle concentration in the air, to determine their classification as ISO 8, according to ISO standard 14644-1:1999.
